

D³EM INFORMATIONAL

12:00PM

OCTOBER 31, 2019 • RICH 910

Are you interested in harnessing the data revolution??

Data Analytics, Machine Learning and AI are all pervasive in academia, industry and national laboratories. Experience with Big-Data is becoming a *requirement* across the job market.

At Texas A&M, we have created an official Interdisciplinary Graduate Certificate on Materials Science, Informatics and Design (D³EM). If you want to learn more about the program and the many learning opportunities available, please come join us for an informational session!

This program is open to students from virtually all departments across the College of Science & College of Engineering. For more information about the program, email Prof. Raymundo Arròyave (rarroyave@tamu.edu) or Haley Nigg (haleynigg@tamu.edu).

For all other information, please visit www.d3em.tamu.edu.
